Eternalize your bond with the TU/e in Alumni Avenue

The walking platform between the buildings of MetaForum and Matrix is as you probably know named Alumni Avenue. This is the place where the alumni can eternalize their bond with the TU/e by engraving their names in the glass. During the Dream & Dare Festival in April 2016 1000 alumni of the TU/e have engraved their names there! The moment of engraving is now a normal part of the Master diploma ceremony.

Speech on behalf of the graduated students

After the official part of the Master diploma ceremony there is an opportunity for one of the students to take the floor on behalf of all candidates and say amongst others a word of thanks. The student may use this opportunity to share his/her personal vision on the study with fellow students, friends and family members.

The candidates meet at **12.30 hours** at the walking platform in MetaForum. There is also an opportunity to arrange who will do the speech on behalf of all the candidates. Besides this you can also check the PowerPoint slide you have sent in. After this you can engrave your name in order to leave behind your footprint at the university together with all the other green alumni of our department.
